Training Workshop on Education Management & Academic Leadership

Prologue

Indian higher education system is one of the largest such systems in the world which is under tremendous pressure as large number of additional students will be knocking at the doors of higher education institutions in the country. New challenges of management and regulations are faced by these institutions, which requires serious attention, both at the institution in the public sector and also those in the private sector. Hence, management in education plays a balancing role between the demand and supply for sustained productivity in any situation and particularly in the context of agricultural education. Education Management create conducive working environment in an institution for greater participation, teamwork, cooperation and synergetic leading to increased productivity and production.

For enhancing competency of faculty in the Agricultural Universities, Academic Leadership is having its significance. The administrative challenges and responsibilities of Academic Leaders have to grow periodically. Therefore, providing quality higher education and quality academic leadership are important for effective leadership development and management in agricultural education. The programme provides opportunity to share the experiences of different academic leaders to improve the leadership qualities of faculty. The programme will also provide practical knowledge and insight for effective leadership development and management in education besides providing new ideas and skills for development of professional growth and faculty development.

Understanding the importance of educational management and academic leadership among faculty members of Agricultural Universities/ Deemed Universities, the present training workshop was formulated with the following objective.

The programme aims to

To enhance the efficiency of Indian Agricultural Education System through Education Management and Academic Leadership

The programme will provide a platform for stakeholders to reflect upon the new directions, actions, choices, and strategies for implementation.

Important dates

He had international exposure to UK, USA, Netherlands, Germany, Belgium, Switzerland, Sri Lanka etc. For more information is available at <https://vidwan.inflibnet.ac.in/profile/115589>

ICAR-National Academy of Agricultural Research Management (NAARM)

The ICAR-National Academy of Agricultural Research Management (NAARM) was established by the Indian Council of Agricultural Research (ICAR) at Hyderabad, in 1976, to address issues related to agricultural research and education management. In the initial years, the Academy primarily imparted foundation training to the new entrants of the Agricultural Research Service of ICAR. Subsequently, its role expanded to include research, capacity building of senior professionals of national and international NARS in agricultural research and education management, and policy and consultancy support to NARS. The Academy also renders services for building IP portfolios like patents and geographical indications to various stakeholders including farmers and scientists. Keeping in view the increasing national and global need to integrate agriculture with agribusiness for raising rural incomes, and the increased emphasis on the creation, dissemination, application and exchange of knowledge in this vital area, the Academy has recently initiated post graduate education programmes and set up an Agribusiness Knowledge Centre. For more information please visit: <https://naarm.org.in/>

National Agricultural Higher Education Project (NAHEP)

Indian Council of Agricultural Research (ICAR) launched National Agricultural Higher Education Project (NAHEP) with the assistance of World Bank (WB) in November 2017 with an overall objective to support participating Agricultural Universities (AUs) and ICAR in providing more relevant and higher quality education to the students. NAHEP is a Multi-Global Practice collaboration (Agriculture and Education) project and supports activities and results directly related to cross-cutting strategic areas of climate change, jobs and gender. NAHEP has been promoting efficiency and competitiveness through changes in working mechanism of AUs, raising the teaching and research standards through improved infrastructure, competency and commitments. There are four key components under NAHEP, namely; Institutional Development Plan (IDP), Centres for Advanced Agricultural Sciences and Technology (CAAST), ICAR to support excellence in agricultural universities (AUs), and ICAR Innovation Grants to AUs, apart from Component 2A.
