Glimpses of Academia-Industry-Government Workshops

National Agricultural Higher Education Project (NAHEP)
Investments in ICAR for Leadership in Agricultural Higher Education

— Investment in ICAR Leadership in Agricultural Higher Education - would finance the carrying out of institutional reforms within ICAR in order to enhance ICAR's effectiveness in coordinating, guiding and managing agricultural higher education and its interactions with AUs and key stakeholders nationwide through interventions that increase the quality and relevance of agricultural higher education. As ICAR is responsible for national coordination and quality assurance of agricultural higher education, the component would leverage ICAR's comparative advantage in assessing systemic challenges across the ICAR-AU System and incubating solutions.
